*A*ll that is required is the “*free Spirit*” to learn. I encourage you to paint in your own style but learn the correct way of applying your pigments, learning the difference of transparency in pigments vs. opaque, and we will learn the color theories by applying to our paintings more than charts. We do experiment with textures and collage when enhancing our work.

*Do you have a problem
with composition?
How about values of light
& tone?
I believe **Unity** is
important (even the
Shadows need to unify
with the total painting.)*

What is “Mother Color”?
This is an important aspect
to improve your paintings.

Do come & experience
the “**Joy**” of painting
watercolor.

*Come Join us, be prepared for
laughter and fun while learning!*
